Date of Loss	May 29, 2026
Estimated Value	\$12,325.00
Status	Approved

Location

Boulder, CO
United States
Incident Type Break in

Incident Details

Thieves cut through roll-up door at our rear dock using a battery-powered cutoff wheel/die grinder. Luckily they crawled in right past the nearest motion detector, so our alarm started sounding immediately upon their entry. They were in the building for less than 60 seconds, so our loss was somewhat limited. Things could have been much worse. We have an extra loud siren for the alarm which was also near their entry point which I think helped, since it is painful to be around. Security footage showed that they arrived in a black late-model Toyota 4Runner, but unfortunately we couldn't read the plates.
